

52-SKIDDOO

BY JOEL NANNI

There is one place for each letter of the alphabet in the 26 empty squares of each blank column in the diagram below. Fill in each letter so that a word of at least five letters is formed reading across only. Not all of the letters to the left and right of the empty box are used; it's up to you to determine which ones are needed to complete familiar words. Some letters may fit in more than one of the empty squares to complete words, but we only came up with one arrangement that would complete a word in each row. Maybe you'll find a better solution. Proper names are not allowed. ANSWER, PAGE 70

A	A	S	T	A		I	W	A		R	E	Y	U	A
B	B	I	Z	V		R	T	E		R	U	K	G	B
